China Outdoor WPC Lumber Factory

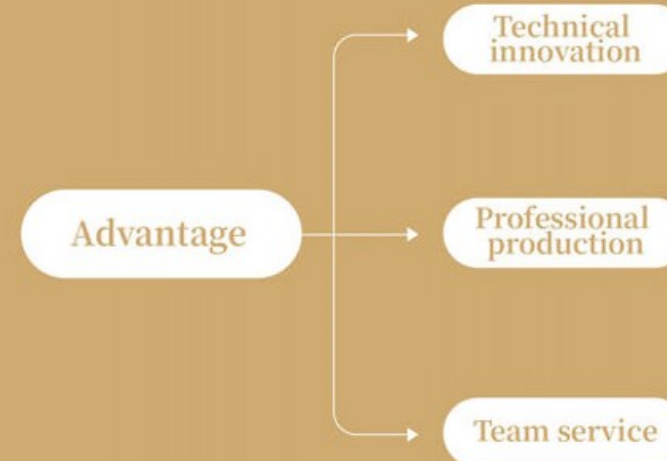

COMPANY PROFILE

We are a professional WPC (Wood-Plastic Composite) manufacturer specializing in high-quality outdoor decking, wall panels, pergolas, and fencing. With 30 advanced extrusion lines and 200+ molds in various series, we offer customizable colors, lengths, and shapes to meet diverse project needs.

Our factory supports OEM production, allowing tailored solutions based on your designs. Whether for residential gardens, commercial landscapes, or architectural projects, our durable, eco-friendly, and low-maintenance WPC products ensure superior performance and aesthetic appeal.

Choose us for reliable quality, competitive pricing, and flexible customization—your trusted partner in outdoor WPC solutions!

- Location: Guangdong, China.
- Introduction: China best manufacture of all kinds of Outdoor WPC decking, Outdoor WPC wall panel, Outdoor WPC tubes, Outdoor WPC railing, Outdoor WPC Aluminium fence, Outdoor WPC tiles, Outdoor WPC Pergola, Outdoor WPC Gazebo, Outdoor WPC Customized drawings products
- Factory Area: 25000 square meters ● Founded: in 2000
- Number of Employees: 150 ● OEM&ODM Customization: Accepted
- Certification: CE, SGS, ISO

We have obtained a number of national scientific research qualifications, certifications, patents, and do their best for the development of the industry!

45 semi-automatic extruded production lines, reasonable and effective production models, Strictly follow the requirements of customer orders to control the quality of factory products, and provide stable and high-quality wood plastic composite products for the market.

Internal and foreign trade, team-based marketing models, real-time analysis of market movements, accurate services, and high-end customized products correspond to market demand.

SERVICE

Pre -sale

Explore product technology and design solutions with customers

In -sale

Strictly follow the requirements of customer orders to control the quality of factory products, as well as the construction guidance and technical support of the product implementation project on site.

After -sale

Product problems caused by various reasons for products will be quickly replaced and maintained.

Pillar

Handrail

WPC railings are usually made from Classic--basic series profiles for processing reasons.

Vertical bar

WPC railings made from materials processed by co-extrusion--basic series
have a more sophisticated texture.

Classic--basic series

No co-extrusion layer, consistent material throughout, relatively simple texture, good deep processing performance.

Co-extrusion --basic series

The surface layer is a co-extruded layer, divided into a co-extruded layer and a core layer. The two layers are made of different materials and have a high-end, luxurious texture, but do not have deep processing properties.

The installation of WPC railings requires careful attention to detail in order to achieve the most secure overall result.

1,High-quality raw materials are mixed and granulated

2,Each model corresponds to at least one set of molds

3,The extruder extrudes the raw material into profiles using a mold

4,The extruded profiles must be neatly bundled and cooled.

Control the production quality of each process according to quality standards

5,Various surface treatments after cooling the extruded profiles

6,Precision cutting of WPC profiles according to requirements

7,Perform woodworking tasks such as drilling, bending, and shaping.

8,Packaged according to order requirements

Loading completed and waiting to arrive in your hands!
